Clean Fittings

for Weld & ZCR Metal Gasket Face Seal

- 1/4 to 1 inch and 6 to 18mm size
- 316, 316L, 316L VOD and 316L VIM VAR Stainless steel material
- Weld Fitting for manual or Automatic welding equipment

Pressure Ratings

The Hy-Lok clean weld fittings and metal gasket face seal fittings are manufactured from material in accordance with material table, and calculated in accordance with ASME code for Pressure Piping B 31.3, Process Piping for allowable stress value of 20,000 psi (equivalent ASTM A269-tubing) wall thickness.

Pressure ratings for fittings are also determined by temperature applied to the fittings.

Allowable working pressure at temperatures greater than 100°F (37°C) may be obtained by multiplying factors shown in Table 1

To determine pressure ratings in accordance with ASME B31.1, Power Piping, multiply working pressure by 0.94

Table 1. Derating Factors

Temperature °F (°C)	Factor	
	316 Stainless Steel	316L Stainless Steel
-20 to 100 (-28 to 37)	1.00	0.84
200 (93)	0.86	0.71
300 (148)	0.78	0.63
400 (204)	0.71	0.57
600 (315)	0.66	0.53
500 (260)	0.63	0.5
650 (343)	0.62	0.49
750 (398)	0.60	0.48
700 (371)	0.60	0.47
850 (454)	0.59	0.46
800 (426)	0.58	0.45
900 (482)	0.57	-
950 (510)	0.57	-
1000 (537)	0.56	-

Temperature Rating

Type	Material	Temperature, °F (°C)
Fittings	316L Stainless Steel	1000 (537)
	316L Stainless Steel	
	Single Vacuum Melt 316L Stainless Steel	
	Double Vacuum Melt 316L Stainless Steel	
Gaskets	316L Stainless Steel	1000 (537)
	Nickel	600 (315)
	Copper	400 (204)

Material

Material	Designator	Specification	
		Bar Stock	Forging
316 Stainless Steel	S316	ASME SA479 ASTM A479 ASTM A276	ASME SA182 ASTM A182
316L Stainless Steel	316L		
Single Vacuum Melt 316L Stainless Steel	SM6L		
Double Vacuum Melt 316L Stainless Steel	VV6L		

Surface Finishes

Grade	Designator	Roughness Average Ra	EP	Material	Packing Standard Class 10
B.A.	B	0.25 μ m (10 μ in)	N/A	S316, 316L or SM6L	Double
High	H	0.13 μ m (5 μ in)	Yes	SM6L or VV6L	Double
Super	S	0.1 μ m (4 μ in)	Yes	VV6L	Triple

Cleaning

Passivation is done in a Nitric environment.

Precision cleaning is done by Ultra-sonic cleansing with resistivity over 18M Ω D.I. water after finishing the passivation.

Packing & Handling

Hy-Lok clean fittings are double packed in anti-static polyethylene bags pressurized with high purity nitrogen gas.

Care should be used to maintain cleanliness.

Packing done in a clean room of Class 10 needs additional packing.

- To maintain and transport in standard-pack condition.
- Remove particles from outer package, open the cardboard or outer package before carrying into clean room.
- To move in double pack condition in clean room, take off the 1st package when used.
- Remove the 2nd package just before welding.

Mini Tube Butt Weld Fittings

- is suitable for the miniature tubing system.
- is available to install the parts closetogether.
- has the equivalent flow capacity with bigger sized weld fitting.

Radius junction means smooth flow transitions and elimination of pockets and entrapment zones.

Laser etch Marking Heat Code Traceability
HY-LOK Clean fittings are marked with Manufacturer, Part No., Material, Surface Finish, Heat Code No. designation.

Typical surface finish is average Ra 0.25 μ m (Ra 10 μ in)

Square, sharp, burr-free tube weld end.

TBW (Tube Butt Weld) and ATW (Automatic Tube Butt Weld) Fittings

- HY-LOK Clean fittings are applicable for two welding shapes. TBW (Tube Butt Weld) and ATW (Automatic Tube Butt Weld)
- TBW is machined for optimal Butt Welding by Automatic TIG welder.

Tube ends are machined with a square face and corners to enhance alignment and maintain tube wall uniformity.

Typical surface finish is average Ra 0.25 μ m (Ra 10 μ in)

Precisely finished diameter matches tube diameter.

Feature

- Provides ultra-high purity Metal to metal seal for vacuum and positive pressure applications.
- Sealing is accomplished by compressing the gasket between the two beads during assembly of the male nut or body and female nut.

Gasket options include - silver plated stainless steel 316L, Nickel plated, unplated nickel or special request.

Roll stamped or Laser etch Marking & Heat Code Traceability
Hy-Lok Clean fittings are marked with Manufacturer, Part No., Material, Surface finish, Heat Code No. designation.

Typical surface finish is average Ra 0.25 μm (Ra 10 μin)

QA leak test port also allows visual inspection of sealing gasket prior to assembly.

The internal surface finish of the female nut is silver plated to ensure consistent, low make up torque.

Typical Assembly

Plating

- Female Nut-The internal surface of the nut is silver plated to avoid galling and reduce the pull up torque.
- Gasket options include-Silver plated stainless steel 316L, Nickel plated, unplated nickel or special request.

Testing

- ZCR Fittings have been helium leak tested to a rate of 1×10^{-10} atm/cc/sec with unplated, silver plated and copper gasket.
- Optional tests are available upon request.

Hy-Lok Clean

ZGSK

Product Pattern Designator

- ZGSK - Gasket
- ZGRT - Gasket Retainer Assembly

8

SP

- Gasket Plating Option*
- Nil - unplated (standard)
 - SP - with silver plated

BL

- Blind Gasket Option*
- Nil - Standard
 - BL - Blind gasket

316L

Gasket Material Designator

- 316L - 316L stainless steel
- NI - Nickel
- CU - Copper

Note

1. Retainer Material for 316L Stainless Steel, Nickel and Copper gasket Retainer Assemblies are 316L Stainless Steel.
2. ' * ' No designator is required for standard gasket
e.g. H-ZGSK-8 - 316L
3. For application of Blind Gaskets exceed not a differential pressure rating of 100 psi(6.8 bar)

Clean Fittings

Assembly Instruction

- Step 1. Prior to tightening fittings, make sure beads and gaskets are free of scratches and dirt.
- Step 2. Insert non-retained gasket into the female nut. The gasket is self aligning. Use caution not to damage sealing surfaces while inserting gasket into female nut.
- Step 3. Finger tighten male and female nuts assuring that all components have made proper contact and are in position for final tightening with wrenches. Inspection port in female nut allows for easy visual inspection.
- Step 4. Make a reference mark on both the female nut and male nut or body hex.
- Step 5. Hold the male nut or male body with the appropriate back up wrench and tighten the female nut $1/8 \sim 1/4$ (1/8 for 316L and Ni gasket, 1/4 for copper gasket) turn past finger tight.

Caution

Do not rotate fixed thread components against the gasket. Hold the fixed thread component and tighten the corresponding rotating female or male nut $1/8 \sim 1/4$ turn past finger tight.

Care for Installation

- 1. Do not attempt to reuse gaskets, use new gasket for remake installations.
- 2. Protect bead end of ZCR during welding, shipping or storage by using the appropriate cap or plug.
- 3. ZCR Fittings will not compensate for tube misalignment.
- 4. Protect internal silver plating on threads of female nuts during polishing, brazing, operations or additional cleaning. These operations could remove the silver plating and cause thread galling.

Ordering Information

- 1. Clean Fitting : Designator "H"
- 2. Name of Fitting : See Title Name of product.
- 3. Tube O.D. : See Tube O.D. or ZCR Size Designator.
- 4. Reduced Ends : See Tube O.D. or ZCR Size Designator in case of Reducing or other connection.
- 5. Type of Weld : See Weld Designator
- 6. Surface Grade : See Surface Finish Designator.
- 7. Material : See Material Designator.

Tube O.D. Designator					
Size (Inch)	1/4	3/8	1/2	3/4	1
Identifier	4	6	8	12	16
Size (Metric)	6mm	8mm	10mm	12mm	18mm
Identifier	6M	8M	10M	12M	18M

Weld Designator	
Type of Weld	Identifier
Butt Weld (Without Shoulder)	Standard
Automatic Weld (With Shoulder)	A
Socket Weld	S
Male Weld	M

ZCR Size Designator					
Size (Inch)	1/8	1/4	1/2	3/4	1
Identifier	2	4	8	12	16

Surface Finish Designator			
Grade	B.A Grade	High Grade	Super Grade
Identifier	B	H	S

Note : Surface Finishes Information see page 3.

Material Designator	
Identifier	Material
S316	316 Stainless Steel
316L	316L Stainless Steel
SM6L	Single Vacuum Melt 316L Stainless Steel
VV6L	Double Vacuum Melt 316L Stainless Steel

SAFETY in FITTING SELECTION

For proper, safe, trouble-free installation, operation and maintenance of fluid systems, material compatibility, pressure/temperature ratings, and application details must be considered in the selection of fittings. Improper selection or use of products described in this catalog can cause personal injury or property losses. It is the responsibility of system designer and user to select and use the products for their specific applications.
